Due to a change in reporting procedures, The numbers on this chart may not be the same as reported in previous years.

Calculations for SA Outcomes:

All outcomes are percent increase or decrease. Specific percentages are calculated as follows using FY final discharges, excluding detox-only clients. Percents at admission and discharge are calculated by dividing the number of clients reporting the outcome divided by the total number of discharged clients with valid, non-missing, data for that measure:

Abstinence (Percent Increase):
(Percent abstinent at discharge **minus** percent abstinent at admission) **divided by** percent abstinent at admission

Stable Housing (Percent Increase):
(Percent not homeless at discharge **minus** percent not homeless at admission) **divided by** percent not homeless at admission.

Employment/School (Percent Increase):
(Percent employed/student at discharge **minus** percent employed/student at admission) **divided by** percent employed/student at admission.

Criminal Justice (Percent Decrease):
(Percent arrested at 30-days prior to admission **minus** percent arrested 30-days prior to discharge) **divided by** percent arrested 30-days prior to admission.

Length of Stay:
Median length of stay calculated from admission date to date of last contact for those discharged in the fiscal year
